Bianco Lucido
Glossy White

Il Politek è un composto di minerali naturali (carbonato di calcio) e resine acriliche di alta qualità. La superficie brillante ed omogenea, simile alla ceramica, è coperta da uno spesso strato di gelcoat che conferisce al manufatto ottime caratteristiche di resistenza e lo rende un materiale pratico per l'utilizzo nell'ambiente bagno. Per la pulizia si consiglia di utilizzare acqua saponata o comuni detergenti non abrasivi con spugna non abrasiva.

The Politek is a compound of natural minerals (calcium carbonate) and acrylic resins of high quality. The surface bright and homogeneous, similar to ceramic, is covered by a thick layer of gelcoat which gives the product excellent characteristics of resistance and makes it a practical material for use in the bathroom. For cleaning we recommend using soapy water or common non-abrasive cleaning with soft sponge.

Top in Resina Materica - "Stone effect Resin" top

NEW

FREEDOM

La Resina Materica ha caratteristiche del tutto analoghe a quelle del Politek, è sempre un composto di minerali naturali (carbonato di calcio) e resine acriliche di alta qualità, con la differenza del colore e della finitura superficiale. Il piano ha infatti una particolare lavorazione materica simile al cemento grezzo, mentre l'interno della vasca lavabo è liscio, per evitare depositi di sporco o ristagni d'acqua. Tutto ciò conferisce al top caratteristiche uniche di design, ma anche praticità nell'utilizzo quotidiano. Per la pulizia valgono le stesse indicazioni del Politek.

The "Stone Effect Resin" has characteristics quite similar to those of Politek, is always a mixture of natural minerals (calcium carbonate) and acrylic resins of high quality, with the difference of color and surface finish. The plan has indeed a special process similar to cement raw material, while the interior of the tub basin is smooth, to prevent dirt or water stagnation. All this gives the unique characteristics of top design and practicality in everyday use. For cleaning, follow the advice of Politek.

Bianco Opaco
Matte White

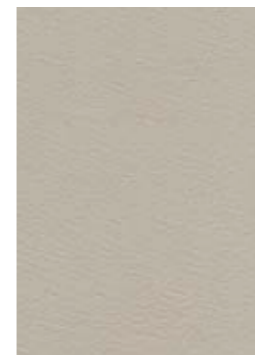

L'Ocritech, un materiale costituito da una speciale resina acrilica colata, le cui caratteristiche lo rendono perfetto per l'utilizzo nell'ambiente bagno.

- invulnerabile dai raggi UV, senza il rischio che con il tempo possa ingiallire;
- solido e resistente agli urti, ma al tempo stesso estremamente leggero, ideale quindi per l'impiego su mobili sospesi senza rischio di sovraccaricare le pareti;
- ha un colore bianco puro ed è disponibile sia in versione lucida che opaca.

The Ocritech, an exclusively material, is made from a special acrylic casting resin whose characteristics make it perfect for the use of the bathroom.

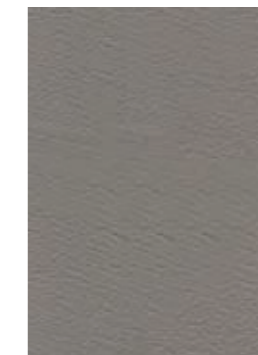

- Invulnerable from UV rays, without the risk that with time may turn yellow;
- Solid and shock resistant, but is also lightweight making it ideal for use on furniture suspended without risk of overloading the walls;
- It has a pure white color and is available in a gloss and matt.
